

Appl. No. 10/729,594
Request for Continued Examination
Reissue of U.S. Patent No. 6,325,294 B2
Atty. Dkt. MM0-367

REMARKS

Applicants appreciate the recognition of patentable subject matter in the present application.

The changes in the original patent made by the Certificate of Correction of October 1, 2002 have been included in this reissue application without underlining or bracketing as required by MPEP 1411.01.

The specification has further been amended to also merely correct minor errors that were not already corrected by Certificate of Correction. These amendments are shown as bracketing for deletions and underlining for insertions.

The Specification has been amended to insert the Related Reissue Applications section in compliance with 37 C.F.R. §1.177 (MPEP 1451).

A statement of status of the claims and support for claim changes, as required by 37 C.F.R. §1.173(c) is being provided in a separate paper.

Referring to the statement of reasons for allowance in the Notice of Allowance mailed October 2, 2007, Applicants object to and disagree with such statements as including language not included in Applicant's claims, in particular with respect to claim 26.

The patent statutes require claims to be presented and interpreted in accordance with what the Applicants regard as their invention. Accordingly, the claims must be read as Applicants regard them (as they are worded). The statements (e.g., see statements with respect to claim 26) as currently worded might be interpreted later as reading limitations into Applicants' claims which simply are not there. In particular, the statements with respect to the second flexible film, first dipole antenna and single integrated circuit of claim 26 include language not recited in claim 26.

Applicants regard aspects of his invention as defined by the claims. MPEP §1302.14 (8th ed., rev. 6) states, in part, that where specific reasons are recorded by the examiner, *care must be taken to ensure that such reasons are accurate, precise, and do not place unwarranted interpretations, whether broad or narrow, upon the claims.* The examiner should keep in mind the possible misinterpretations of his or her statement that may be made and its possible estoppel effects.

In accordance with the above, the Examiner must interpret the claims in accordance with their literal wording, and to the extent the Examiner has not already done so, such is mandated now. If the Examiner relies upon allowance based upon language not appearing in the claims, the Examiner must reject the claims and suggest insertion of such language. Then, Applicants can respond as they deem appropriate.

Allowance of the claims as literally worded is urged. If the Examiner's next action is a Notice Of Allowance, this file history is to be interpreted as if the Examiner's statement of reasons for allowance in the last Action never existed or was withdrawn. If the Examiner disagrees with this just stated position, claim rejections are mandated.

The Examiner is requested to phone the undersigned if the Examiner believes such would facilitate prosecution of the present application. The undersigned is available for telephone consultation at any time during normal business hours (Pacific Time Zone).
